	<b>Examiner</b> ALVIN J. GRANT	<b>Art Unit</b> 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1, 2, 5, 27, 28-33, 35 and 46-49** are rejected under 35 U.S.C. 102(b) as being anticipated by Shew 1,215,726.

Regarding **claims 1, 2 and 5**, Shew discloses a bi-directional tool for applying drive torque comprising: a flexible head having a split aperture (at 14,15) therein that defines a torque-applying gripping surface; and elongate handle (1); and cam means (at 17) arranged to couple that handle and the flexible head; and effective to close the split aperture and increasingly tighten a grip applied by the torque-applying surface as more torque is applied to the handle, the cam means comprising two slots (16) provided in the flexible head and respective pins (17) located in the slots, the slots extending divergently outwardly with respect to the slit aperture and the pins being fixedly connected to the elongate handle (Fig. 2); the cam means further comprises a surface on the elongate handle extending in a direction transverse to a longitudinal axis of the elongate handle for engagement with the flexible head to move the flexible head when the torque is applied to the handle; and two plates mounted on opposite sides of the elongate handle at one end thereof to define an end surface of the handle with recess therebetween, a portion of the flexible head being mounted in the recess.

**Regarding claims 27, 28-33 and 35 and 46-49**, see Figs. 1-3.

***Allowable Subject Matter***

3. **Claims 6, 7, 34, 36-43 and 45** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. **Claim 44** is allowed.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
